-----
+-----+
Menu ---
1. Sort files in Ascending order
2. Business Level Operation
0. Exit from the console
-----

Select Option(NUMBER between 0 & 2):
```

After entering 1 as selection for sort files it will print the list of files in Sorted order. After Sorting it will provide option to again select from Menu of Sort files or business level operation or exit from program.

**Picture 3- On entering number 2 – Entered in business level operation**

```
Command Prompt - java MainFunction
Menu ----
1. Sort files in Ascending order
2. Business Level Operation
0. Exit from the console
-----
Select Option(NUMBER between 0 & 2):
2

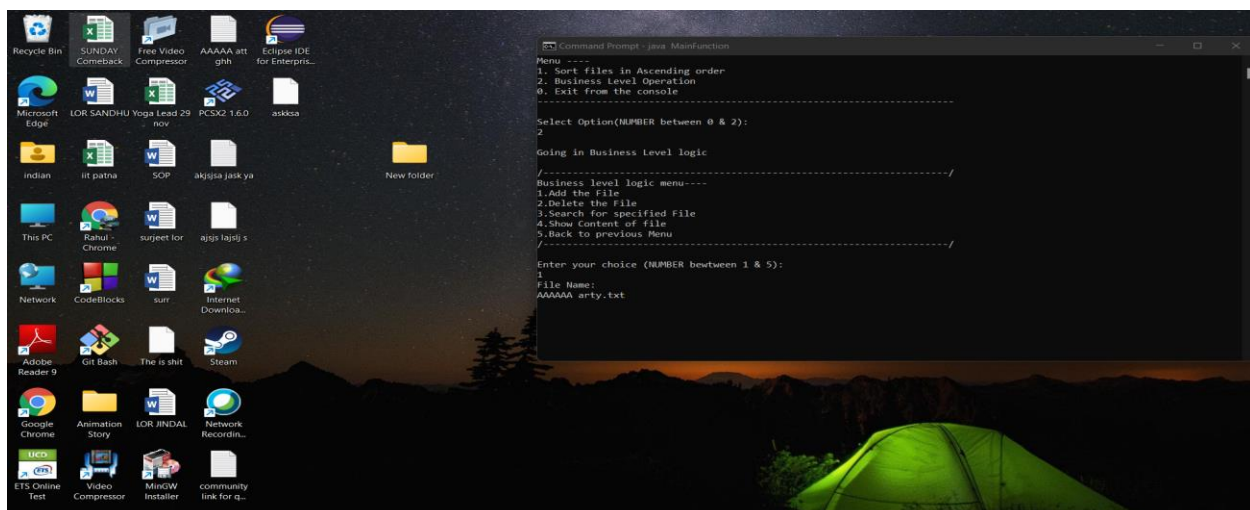

Going in Business Level logic

/-----/
Business level logic menu----
1.Add the File
2.Delete the File
3.Search for specified File
4.Show Content of file
5.Back to previous Menu
/-----/

Enter your choice (NUMBER between 1 & 5):
```

On entering number 2 and entered in business level operation, it will provide Business level operation- such as add the files, delete the files , search the files, show content of the file and back to previous menu.

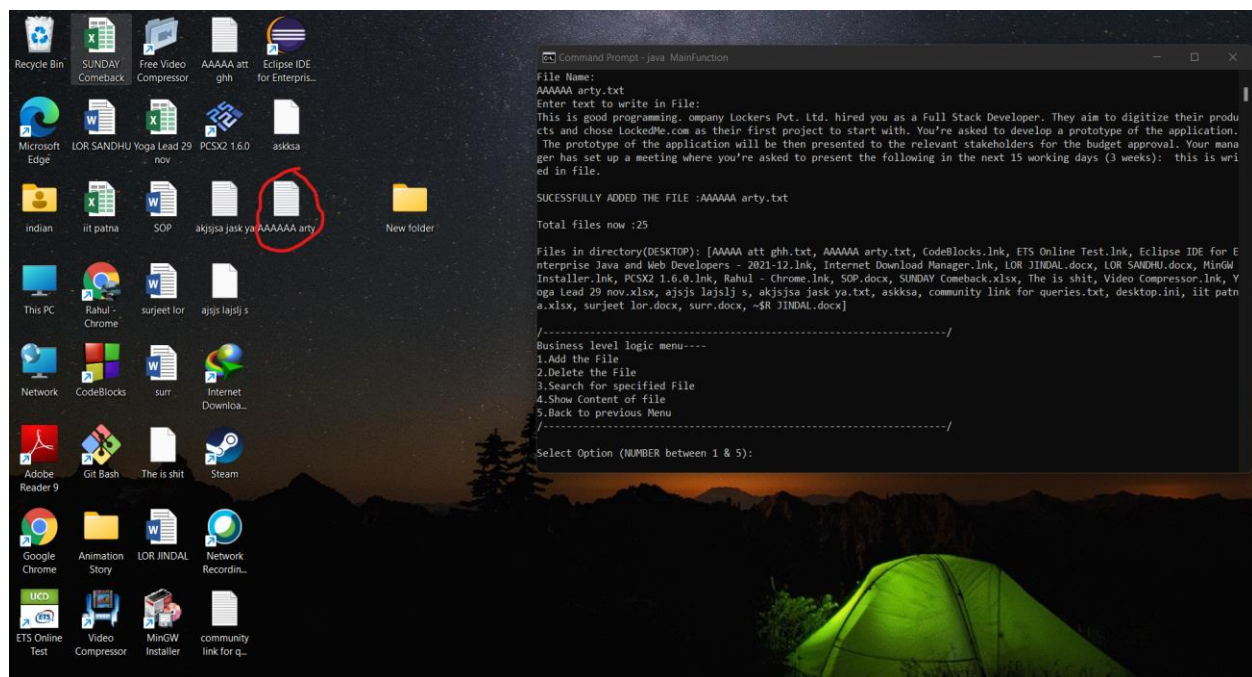

**Picture 4- On entering number 1 in business level operation – It will add the file to DESKTOP Path**

The above picture is before adding the file –AAAAAA arty.txt, you can see there is no file on Desktop with this name until add option is selected.

After selecting the add the files option it will ask for enter FILE NAME and then ask what to enter in the file.

NOTE- You can provide format of file in the FILE NAME(i.e FILE NAME.txt or FILE NAME.docx)

The above picture shows that file with name - AAAAAA arty.txt is created and test is added in the file and also total files on desktop increases count to 25.

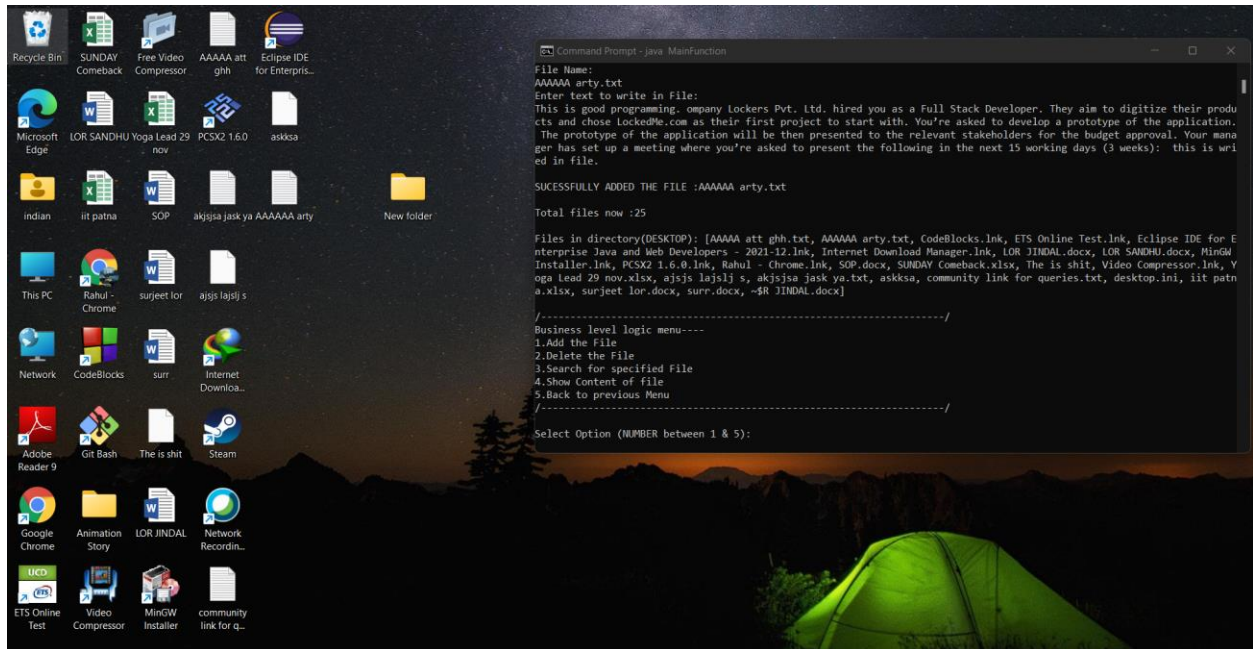

After the add option completed it will again ask for which operation to perform in the business level operation.

#### Picture 5- On entering number 2 in business level operation – It will delete the file from DESKTOP Path

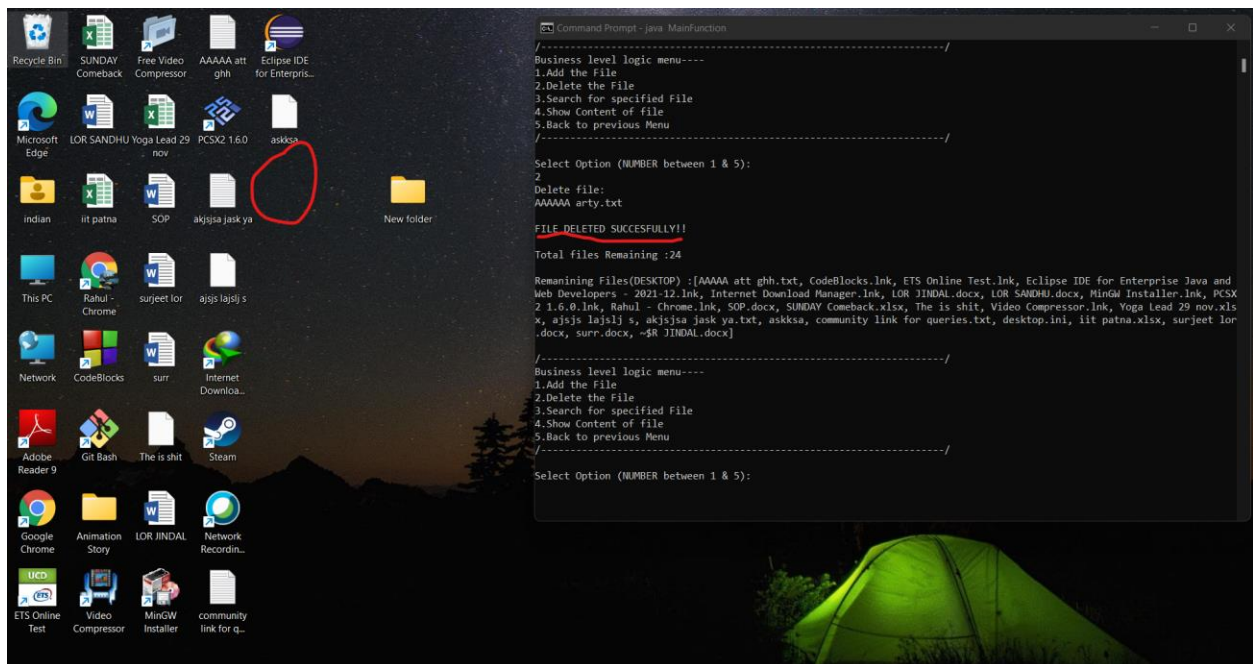

On selecting option 2 by entering 2 in selection menu of Business level operation. It will lead to delete option of the file.

The below picture is showing the DESKTOP all files before deletion. Note- You should enter file full name in case sensitive and with format type(i.e .txt or .docx whatever).

So below is picture before deletion operation.

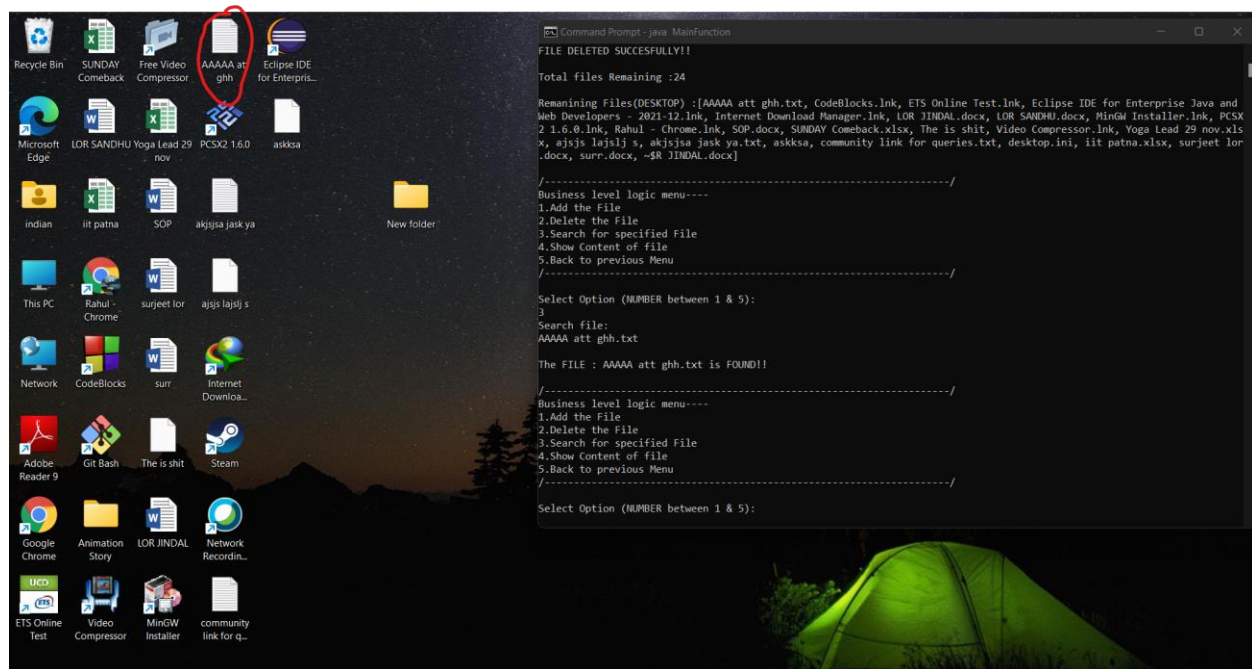

After we select the delete operation and provide file name to delete as - AAAAAA arty.txt then the file with name - AAAAAA arty.txt will be deleted from desktop as you can see in the below picture.

I also have encircled the location from where file is deleted. After deletion it will again ask for selection from Business level operation.

**Picture 6- On entering number 3 in business level operation – It will search for the file in the DESKTOP Path**

In this picture, we can see that on entering selection number 3 it will ask to search the file in the desktop path, so enter the file name which you want to search. NOTE- The name should be complete that is it should include format type with file name i.e(FILE NAME.txt or FILE NAME.docx etc)

After entering the file name it should indicate whether the file is preset on desktop or not. Here encircled file is searched and it shows output AAAAA att ghh.txt is FOUND!!

After execution of this option it will again ask for select option from Business level operation.

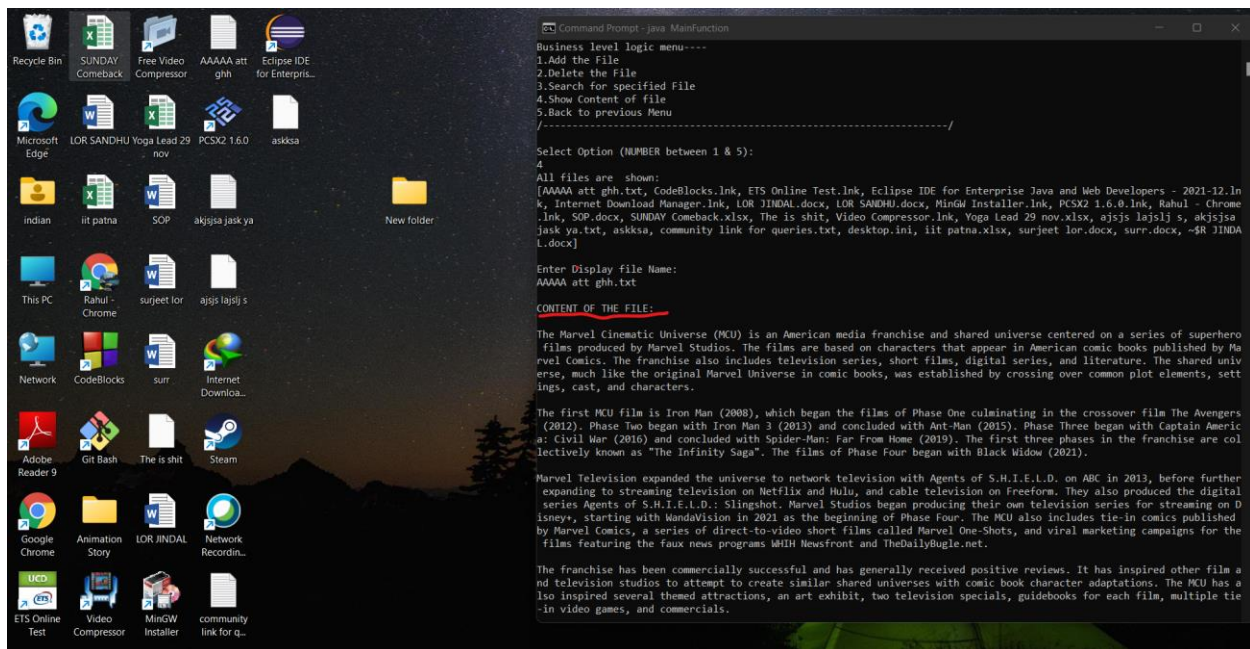

**Picture 7- On entering number 4 in business level operation – It will display the Content of file presented in the DESKTOP Path**

On entering the number 4 in the selection menu, it will ask for which file you want to display the content. So you have to enter the FILE NAME to console to print its content.

Note- It will only print text of those files, which are created via this program or added option of the program. Otherwise it will provide other files byte coded output.

Encircled item is searched and is found on the desktop by this program and then it will display the output of the file in the console as string output.

Below is output of the Display selection from Business level operation. After the underline text in picture, the content of file is shown.

Picture 9- On entering number 5 in business level operation –Return back to previous menu

```

C:\ Command Prompt - java MainFunction

a: Civil War (2016) and concluded with Spider-Man: Far From Home (2019). The first three phases in the franchise are collectively known as "The Infinity Saga". The films of Phase Four began with Black Widow (2021).

Marvel Television expanded the universe to network television with Agents of S.H.I.E.L.D. on ABC in 2013, before further expanding to streaming television on Netflix and Hulu, and cable television on Freeform. They also produced the digital series Agents of S.H.I.E.L.D.: Slingshot. Marvel Studios began producing their own television series for streaming on Disney+, starting with WandaVision in 2021 as the beginning of Phase Four. The MCU also includes tie-in comics published by Marvel Comics, a series of direct-to-video short films called Marvel One-Shots, and viral marketing campaigns for the films featuring the faux news programs WHIH Newsfront and TheDailyBugle.net.

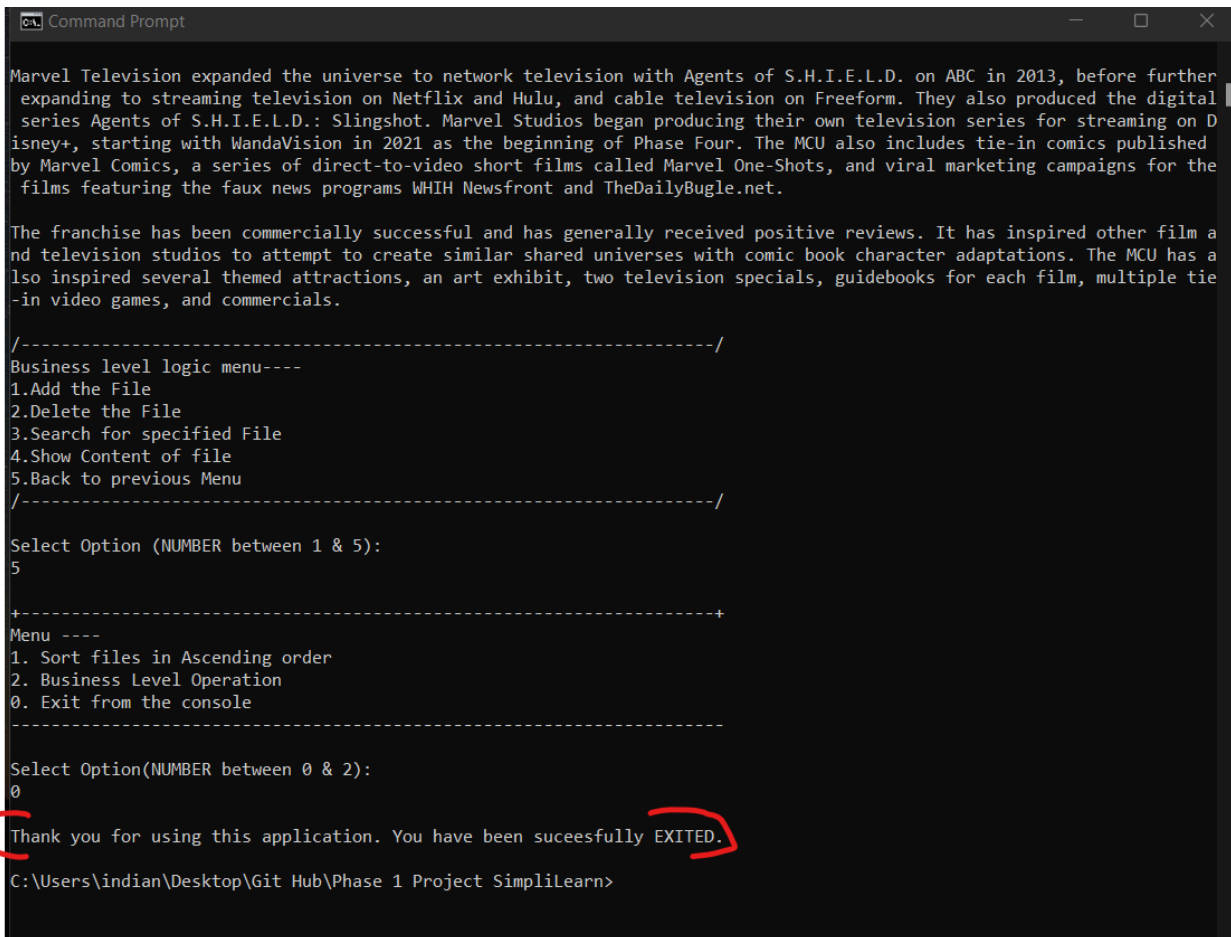

The franchise has been commercially successful and has generally received positive reviews. It has inspired other film and television studios to attempt to create similar shared universes with comic book character adaptations. The MCU has also inspired several themed attractions, an art exhibit, two television specials, guidebooks for each film, multiple tie-in video games, and commercials.
